EV Charging Infrastructure & Operations

echarging | Executive Snapshot

eCharging in one view

01

Founded
July 2023

02

HQ: Hanoi

03

Nationwide Coverage
63 provinces

Building safer, more trusted *charging infrastructure*

- Reliable deployment
- Disciplined operations
- Customer transparency
- Long-term service quality

One partner across the charging lifecycle

End-to-end solutions that power reliable, future-ready EV infrastructure.

1. AC/DC Installation
2. Commissioning
3. Maintenance & Troubleshooting
4. Equipment Supply
5. Digital Operations Solutions

An operating model built for scale

Governance

Clear policies, accountable decision-making, and transparent reporting drive consistency and trust.

Regional Deployment

Localized execution with scalable standards ensures efficient rollout and operational excellence.

Independent Quality Control & Inventory Discipline

Rigorous quality assurance and disciplined inventory management ensure reliability and performance.

Three technical regions.

63 provinces and cities.

NORTH

CENTRAL

SOUTH

Technical readiness, organized for response

- Experienced regional engineering leads
- Trained technicians
- 24/7 availability
- Independent quality control

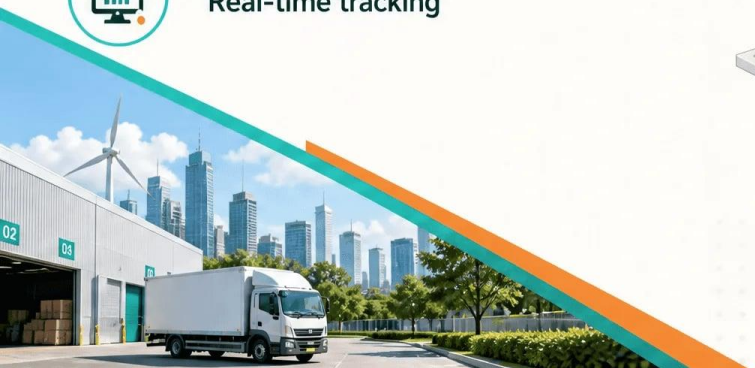

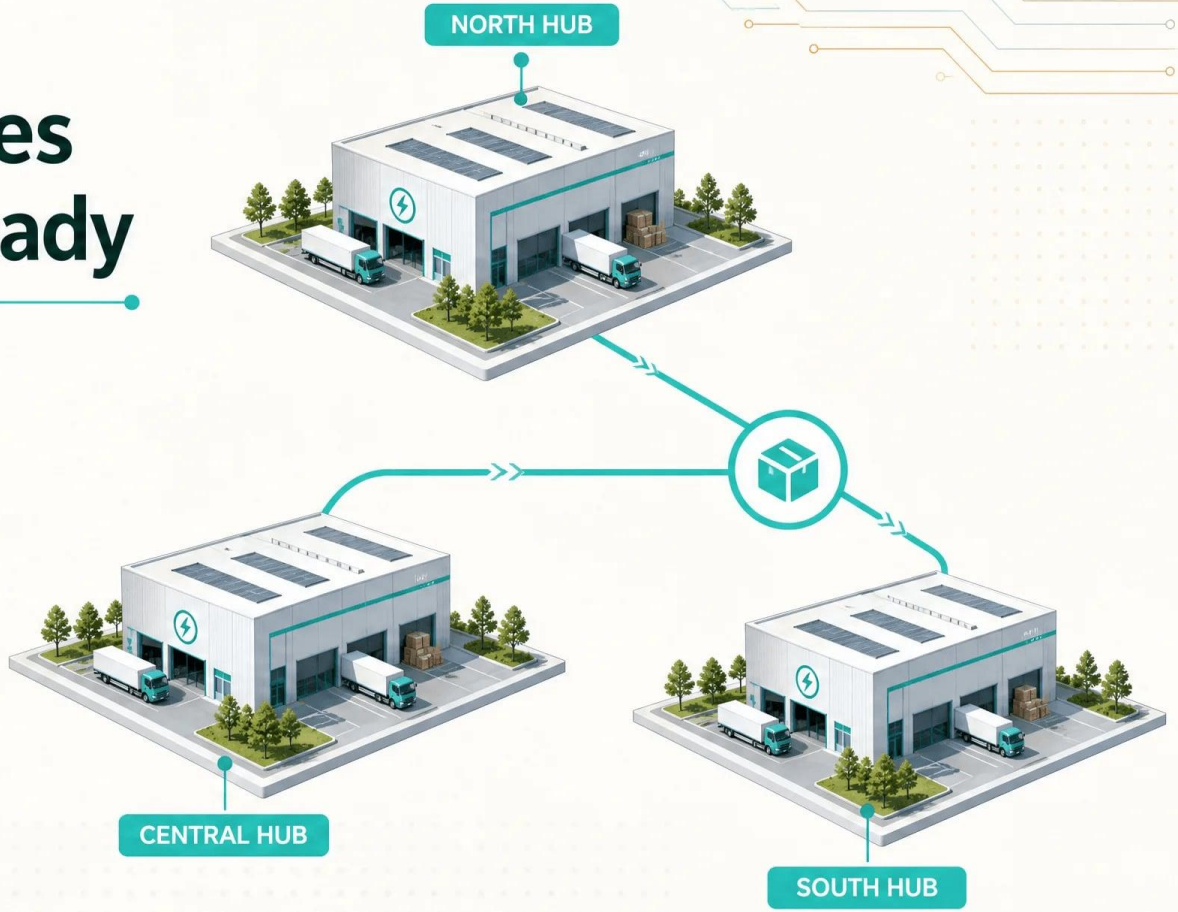

eharging

EV Charging Infrastructure & Operations

Three warehouses keep materials ready

- North, Central, South hubs
- Independent inventory control
- Real-time tracking

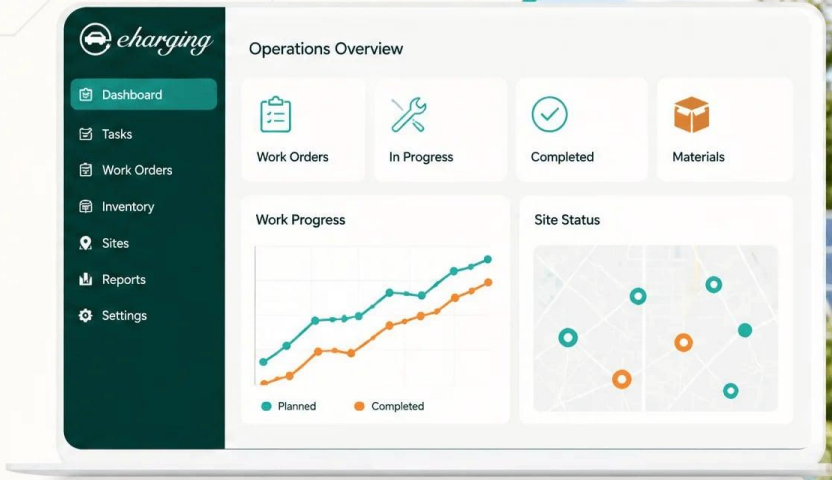

eharging

Technology is the second operating layer

Connecting work, people, and materials to power every charge point.

EC Task Manager

Plan, assign, and track work across your operations.

- Work Orders
- Field Execution
- Progress Monitoring

EC Inventory

Track and control materials with accuracy.

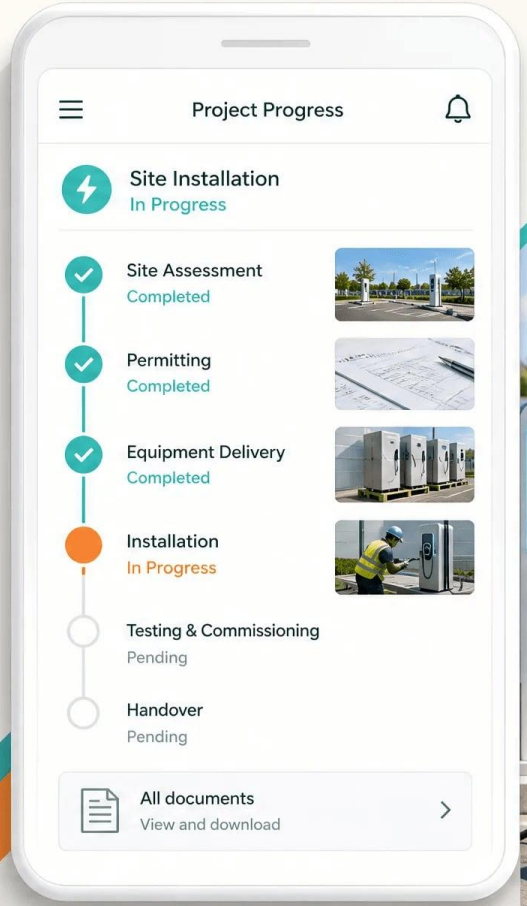

- Material Availability
- Stock Visibility
- Material Control

Work Orders → Field Execution → Progress Monitoring → Material Control

CUSTOMER TRANSPARENCY

Customers can follow execution in real time

- 24/7 visibility
- Assignments and progress
- Quality photos and documents

Traceability from component to charging site

Component in Warehouse

Technician in the Field

EV Charging Site

- Track quantity and location
- Condition status
- Reduce loss and keep materials available

Central Region

Public Charging Station

Supporting the Green Transition

charging

EV Charging Infrastructure & Operations

Representative projects | South

Dimec, Ho Chi Minh City

Hoài Châu, Vĩnh Long

A complete service lifecycle for every site

End-to-end lifecycle services that keep your EV charging infrastructure reliable, efficient, and future-ready.

charging

EV Charging Infrastructure & Operations

- Home charging for multiple EV brands
- Official partner for VinFast and Ford
- AC 7/11 kW single & three-phase
- Supporting BYD and other owners

eharging

EV Charging Infrastructure & Operations

Five steps from survey to supported operation

1. 48h Survey
2. Equipment Selection
3. Construction Plan
4. 3-hour Installation
5. 24/7 Support & 24-month Warranty

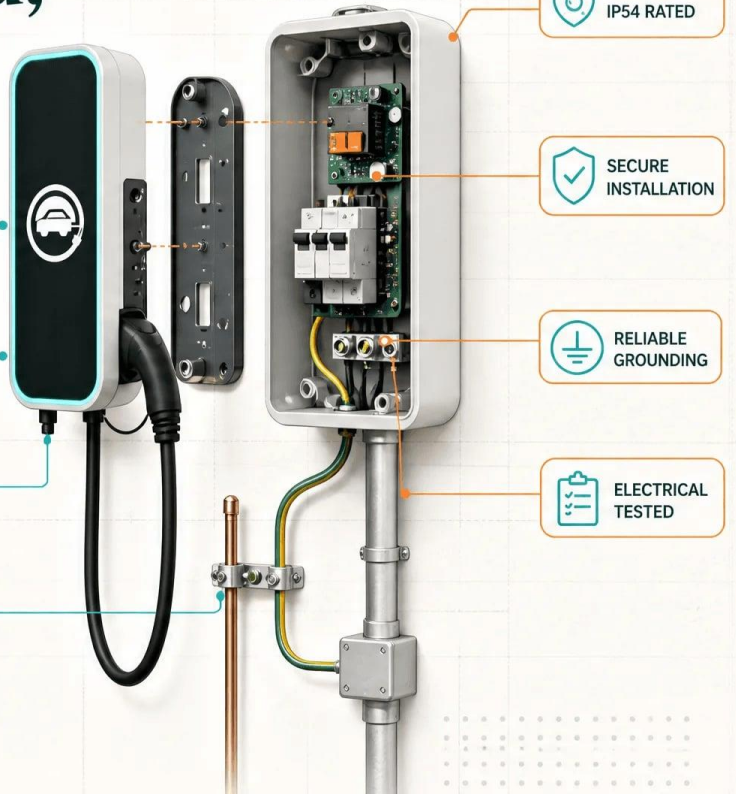

Safety is an engineering standard, not a compromise

IP54 outdoor rating
Built to withstand dust and water exposure.

Secure mounting
Wall-mounted with robust hardware for stability.

Proper grounding
Continuous ground connection for safe operation.

Electrical testing
Tested for electrical safety before energizing.

Why eCharging

- Field experience
- Nationwide coverage
- Controlled quality
- Real-time technology
- 24/7 maintenance support

A broader partner ecosystem. One accountable operator.
