Fast cleaning of big-size oven pans!

Dolphin Utensil Washer

Designed to wash large oven pans

Wide washing area for utensils, oven pans, and food boxes

Fast washing (only 2 minutes)

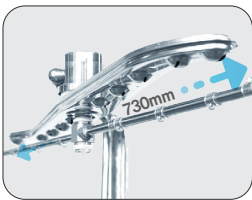

Washing of max. 9 oven pans (60 × 40cm) at the same time

Made in Korea, with after-sales service provided

Manufactured in Korea and supported by after-sales service

| Product feature

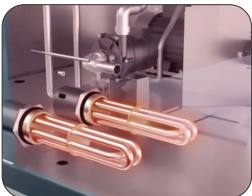

Large washing arm

A big-size 73 cm washing arm uses powerful water jets to ensure spotless, thorough cleaning.

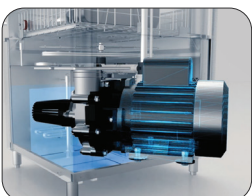

Custom utensil rack

A dedicated wire utensil rack (75.5 × 75 × 9.2 cm) enables the washing of various utensils with complex shapes.

Internal booster tank

A built-in booster tank, eliminating the need to install an external water heater, ensures effective sterilization with a hot water.

High performance wash pump

A wash pump operating at 3,450 RPM increases washing power by 5% through its powerful jet force, compared to our standard existing pump.

Dolphin Washing Technology

Simple and Clean

Perfect for greasy oven pans

Easily removes tough, baked-on grease using a specially formulated detergent

Ideal for mixing bowls prone to dough sticking!

Effectively removes sticky dough and residues with a powerful water jet

Designed for hard-to-clean utensils

Equipped with a washing arm for spotless, thorough cleaning

I FAQ

Q. What is the maximum washing size?

A. The maximum washing size is 75×75×55 cm, making it possible to wash large bakery utensils that are very difficult to clean in conventional door-type dishwashers.

Q. How many utensils can be washed at one time?

A. It is recommended to wash up to 9 oven pans (size: 60×40×30 cm) at one time. The number of utensils that can be washed may vary depending on the utensil size and level of contamination.

Q. Is after-sales service available?

A. Dolphin manufactures its products in its own factory in South Korea, with strict attention to quality. This ensures the continuous availability of spare parts and reliable after-sales service.
